# Outline

- 1 Introduction
- 2 Example Slide
- 3 Conclusion

Welcome to my first Beamer presentation!

- Beamer is used for creating slides in LaTeX.
- It supports text, lists, images, and math.
- Easy to structure and professional.

# Text Formatting

You can make text **bold**, *italic*, or `monospace`.

Example list:

- ① First point
- ② Second point
- ③ Third point

# Conclusion

## Summary

Beamer is powerful, flexible, and perfect for academic presentations.

Thank you!
